

# Workforce Solutions for Renewable Energy

Skilled professionals and industry experts help you reach your goals

For decades GSE Absolute has built a team of talented experts in technical staffing and procedures to help alleviate pressure from workforce reductions and critical knowledge gaps.

Through our extensive company resources and decades of energy service experience, GSE Absolute is well positioned to quickly deliver skilled professionals when and where our clients need them. Whether the project is wind, solar, geothermal or biomass, GSE provides qualified experts who take pride in their work and have the proven experience necessary for success.

At GSE Absolute, we understand the impact of having the right people and the right skills in place. We provide only experienced and degreed personnel to help lessen the burden of operations, to fill talent or knowledge gaps, and to assist with those challenges that require a special skill set. We are committed to finding the right talent to support your needs.

## GSE PEOPLE

Our consultants, technical staff and support personnel are prepared to make a difference. Collectively we bring significant plant and field experience to bear, are actively involved in industry organizations and initiatives, and aggressively enhance our knowledge with new technology- and experience-based learning.

GSE consultants possess:

- Extensive, highly specialized knowledge
- Field experience
- Additional unique training and backgrounds to meet niche needs
- Qualification to perform assessments, assist in defining project scope, and successfully manage projects
- Mindset and approach to make a difference immediately
